

- Spooling, Coiling, Cutting
- Any type of tubing
- Custom lengths

VALUE-ADDED

Product Number VALUE-ADDED

Insulation Products Corporation prides itself on superior Value-Added services. From spooling and coiling of any length to custom cut (to length) pieces, everything is done in our state-of-the-art facility under ISO9001:2000 quality standards.

Small volume, high volume, tight tolerances; IPC can do it all. Spools and coils can be marked with your specific label requirements. Cut pieces can be bagged per your specifications.

If you have specific requirements give us your spool dimensions and the amount on each spool.

IPC can also slit down the length of certain tubings, create bar codes and offer JIT services from our large inventory.

IPC is your one stop shop for all your tubing needs. Please contact a salesperson for additional details.
